SUMMARY

AI/ML engineer (B.E. CSE) who builds and evaluates LLM systems. Built AI agents, multi-agent LLM, NLP, and computer vision applications in Python (FastAPI, LangChain, PyTorch, Transformers) at Vdart, including an AI proctoring system with face and voice identity verification and real-time violation detection. Applied prompt engineering, RLHF, preference ranking, and adversarial prompt testing at Ethara AI to improve LLM quality, instruction-following, and reliability.

CERTIFICATIONS

AWS Certified Cloud Practitioner | Google Cloud Career Readiness: Associate Cloud Engineer Track (2023) | Salesforce Administrator Virtual Internship (SmartInternz, 2023) | NPTEL – Human Computer Interaction & Java

SKILLS

Programming & Core CS: Python, Object-Oriented Programming, SQL, REST APIs (FastAPI, Flask), API & Webhook Integration, Git/GitHub, SDLC

Machine Learning & Deep Learning: Machine Learning, Deep Learning, NLP (Named Entity Recognition, Text Similarity), Computer Vision (YOLOv8 Object Detection), Speech Processing, Anomaly & Violation Detection, Identity Verification (Face & Voice), Document Parsing, Model Evaluation

LLMs & AI Agents: Prompt Engineering, Adversarial Prompt Testing, LLM API Integration, AI Agents, Multi-Agent Systems, Agent Orchestration, RAG (Retrieval-Augmented Generation), Structured LLM Output (JSON), LLM Evaluation, RLHF, LLM Post-Training, Reward Modeling, Workflow Automation (ActivePieces)

LLMs Used: Llama 3, Phi-3, Claude, Gemini, DeepSeek

Frameworks & Libraries: PyTorch, TensorFlow, Transformers, Hugging Face, LangChain, spaCy, OpenCV, SpeechBrain, Ollama

Databases, Cloud & Tools: MongoDB, Supabase, Vector Databases (FAISS), AWS, Google Cloud, Power BI, Excel

EXPERIENCE

AI/ML Intern | Vdart | Tiruchirappalli
June 2025 – January 2026

- **Smart Interview System:** Built a FastAPI AI proctoring platform with real-time violation detection: YOLOv8 phone/device detection, face and SpeechBrain voice-embedding checks against impersonation, and WebRTC VAD background-speech detection, with auto-termination logic. Added local Llama 3 question generation and scoring.
  Tech: YOLOv8, OpenCV, PyTorch, SpeechBrain, Ollama, Llama 3, FastAPI, WebSockets
- **Orca-AI (Generative Application Generator):** Built a local-first multi-agent system (FastAPI, Ollama, LangChain) that turns natural-language prompts into full-stack web apps using prompt-engineered agents, three parallel coder models, and an LLM judge, with AST/JSON validation and auto-retry; progress streams over WebSockets.
  Tech: Ollama, LangChain, Llama 3, Phi-3, FastAPI, GitHub API, WebSockets
- **AI-Powered Resume Parser:** Built a Flask/MongoDB resume-screening pipeline using BERT NER, DistilBERT QA, and spaCy to extract candidate data, with TF-IDF job-match ranking, role-based login, and Google Drive upload.
  Tech: Transformers, spaCy, Flask, MongoDB, TF-IDF, Google Drive

LLM Trainee | Ethara AI | Haryana | Remote
February 2026 – May 2026

- Worked on end-to-end RLHF workflows on the Multimango platform — data annotation, preference ranking, and reward signal generation — to improve LLM output quality, instruction-following, and alignment.
- Evaluated model outputs across text, visual, and structured data, identifying hallucinations, reasoning failures, and formatting errors to provide feedback signals for reward model training.
- Applied prompt engineering to write adversarial and constraint-aware prompts that stress-tested model behavior and uncovered instruction-following edge cases; curated and corrected training data to meet post-training quality standards.
  Tech: Multimango, RLHF, Prompt Engineering, Reward Modeling, Data Annotation, Model Evaluation

ADDITIONAL PROJECTS

- **Bug Report Enricher (Personal):** Built an AI agent on ActivePieces that structures GitHub bug reports, detects duplicates, and routes low-confidence cases to a human approval step.
- **ASI Naturals (Freelance):** Built a Supabase-backed order and stock tracking app for a small business client, with invoice import, low-stock alerts, and order history lookup.

EDUCATION

Bachelor of Engineering (B.E.) – Computer Science & Engineering | K. Ramakrishnan College of Engineering, Tiruchirappalli | CGPA: 8.1/10 | 2021–2025
Higher Secondary (+2) & Secondary (SSLC) | Periyar Centenary Memorial Matric Hr. Sec. School | HSC: 88.2% | SSLC: 85% | 2018–2021

Availability: Immediate **Willing to Relocate:** Yes **Open to Remote:** Yes
